

MLA-0305 Reinforcement Learning – Lab Experiments

Name: L. Sanjay Kumar

Reg No: 192425226

Experiment No. 1: Installation and Configuration of Anaconda Navigator, Python, TensorFlow, Keras and Gymnasium

AIM: To install and configure Anaconda Navigator, Python, TensorFlow, Keras, and Gymnasium for developing and executing Reinforcement Learning applications.

PROCEDURE

Download and install Anaconda Navigator.

Create a new Python environment.

Install TensorFlow, Keras, and Gymnasium using the required package manager.

Verify the successful installation by importing the libraries.

Execute a simple test program to ensure all packages are configured correctly.

OUTPUT python

Anaconda
